BELÉZA™

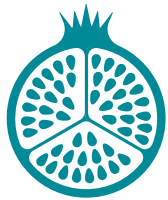

BY VASAYO™

COLLAGEN

HYDROLYZED & MICRONIZED

Collagen is the main structural protein in our connective tissues. As we age, collagen levels deplete causing damage to our joints and skin. Science has shown that supplementing can help maintain healthy levels as we age. Beléza Collagen utilizes a hydrolyzed source of collagen that is further ultra-micronized to create the smallest molecule possible for easy and speedy absorption.*

POMEGRANATE EXTRACT

Pomegranate contains powerful antioxidants known as punicalagins that protect our cells from free radical damage giving your skin a more illuminated and vibrant appearance.*

COLLAGEN SOURCE

Beléza Collagen is made of type 1 collagen derived from fish to support beautiful, glowing skin, while other companies use type 2 collagen derived from chicken sources or bovine, the latter of which contains type 3 collagen and is primarily for joint health.

SERVING SIZE

Once your body receives all the collagen it can absorb, remaining collagen is broken down into amino acids that serve as additional nutrients for your body. Beléza Collagen is designed to be taken 10 days in a row, once a month, to give your body an effective, healthy dose of collagen.*
